CIA/ Domestic intelligence/CDN story syndicated today HW 1/25/75

WGMS has, I think, UPI service. On its newscast at 1:55 pm., immediately prior to the Metorpolitan Opera broadcst, it had an item saying that the CIA confirmed the CDN story that it used a TV and radio monitoring service. It then said that the SDN attributed its information to "a source in the intelligence community."

Well, I've never used a cover and that would be a slick one!

Probably what happened is the Finley consulted somex of his own sources on a limited aspect of the story and the operation.

He did check this with CIA. So, CIA could also be "a source in the intelligence community." As could a former Army private like O'Brien.
